

Internet-Fraud Assessment

Solution Overview

The use of web technologies represents business models that are transforming ways to manage sales, clients, and operations. However, risk and exposure of business online is growing at an alarming rate. An organization must control commercial, operational, security, and geographical metrics to avoid losses, protect data and manage operations. A well developed fraud and data security program protects lost revenue, maximizes efficiency and is good business. JCO Group offers our Internet Fraud Assessment developed for advertisers, corporations and anyone facilitating sales through the internet.

Business Needs

Your organization understands the importance of the web either as an operational tool to reduce costs, keep your customer informed or to sell goods or content online. However, being online has responsibility to all stake-holders including investors, clients, employees, and government. If you are encountering higher levels of fraud, charge-backs, or relationship fraud issues with clients or partners you should evaluate your programs and processes. JCO Group can support you at whatever stage you are in the cycle:

- Where should you start? What information should you be collecting, authenticating, scoring and verifying?
- What's the importance of phone/drivers license numbers, IP address, business address, etc?
- What do your customers expect from your organization while registering to do business, while buying items, or while managing an ongoing relationship?
- How will your website be kept secure? What technology is needed? What's your process to minimize Phishing?

Business Solutions

JCO Group's approach combines our extensive experience in delivering card industry solutions with our experience in delivering fraud management and Internet oriented business solutions to issuers, merchants, governments and service providers. We bring a unique, industry focused approach to payment options, fraud prevention, data protection and risk management online.
